

The slide show that was posted with “(Great)Granny’s letter to her doctor” can stand alone as a slide show for any audience. See this document as a guide.

(#1) There are many legal actions now underway against the makers of the Covid-19 vaccine products, as well as against public health and media officials in many countries. (4 slides - by far NOT a complete list <https://elizabethnickson.substack.com/p/closing-in-on-the-covid-conspirators>)

(#2) Canadian physicians have been shamed, bullied, had their office raided, were shut down online and even fired just for asking questions or for doing what one would think every medical professional should naturally be doing — questioning the information that the pharmaceutical companies provide and asking for actual proof of their claims. Many people are shocked to hear that Health Canada virtually eliminated the requirements for the vaccine companies to prove that the vaccines were safe and effective before the pandemic and that even though everyone told us these products were “proven safe and effective” there was no proof. (3 slides <https://nationalcitizensinquiry.ca/witness/shawn-buckley/> See #14 for links to physicians’ testimonies.)

(#3) It has become clear that manufacturers and regulators were aware of the harms of the vaccine BEFORE medical professionals and others were mandated to take the shots. (3 slides, by far not a complete list <https://totalityofevidence.com/pandemic-timeline/pandemic-2021>; <https://web.archive.org/web/20221130092506/https://www.ahajournals.org/doi/10.1161/CIRCRESAHA.121.318902>)

(#4) Many Canadians are now concerned that their own doctors would have been pressured to take these products at a risk to their own long term health while being told it was for their good and the good of all of society. Canadians are now waking up to the fact that significant numbers of physicians who were also forced to be injected have since suffered long term injuries and even death in ways that match cases that have been investigated and were demonstrated to be caused by parts of the Covid vaccine products. By now, the vaccine has harmed more people than the illness. (11 slides, <https://makismd.substack.com/p/news-132-canadian-doctors-have-died-38e>; <https://drtrozzi.org/2023/09/28/1000-peer-reviewed-articles-on-vaccine-injuries/>; <https://kirschsubstack.com/p/data-from-us-medicare-and-the-new>; <https://drtrozzi.org/2023/11/01/dr-trozzi-urgent-message-to-doctors-and-nurses/> NOTE: This list is by no means comprehensive. Dr. Denis Rancourt’s testimony to the National Citizens’ Inquiry goes deeper: <https://nationalcitizensinquiry.ca/witness/denis-rancourt-ottawa/>)

(#5) Everyday Canadians and medical professionals who have had to do a complete turnaround in their thinking about these vaccine products might wish to reach out to organizations like the Canadian Covid Care Alliance and the Canada Health Alliance who support new members. These groups exist partly because the fight to combat mainstream media censors, along with the power of the “disinformation gurus”, are often too strenuous for medical professionals to face alone. Both organizations publish newsletters. The CCCA runs a website with information including on the care of the elderly, mothers in pregnancy, children, etc. (2 slides, <https://www.canadiancovidcarealliance.org/about-us/> & <https://canadahealthalliance.org/>)

(#6) The CCCA also looked into conflicts of interest among Canadian health officials, etc. which can shatter anyone's confidence in official public health guidance. (1 slide, <https://www.canadiancovidcarealliance.org/ethics-legal/conflict-of-interest-series/>)

(#7) Health Canada was aware of many of the problems with the Pfizer product but kept it on the market anyway. (7 slides, <https://viralimmunologist.substack.com/p/explosive-story-health-canada-admits>)

(#8) People are learning that Covid vaccines can suppress the immune system, leaving recipients at more, not less, risk of getting ill from a very wide range of infections. (1 slide, there is by FAR much MORE evidence <https://www.ncbi.nlm.nih.gov/pmc/articles/PMC9012513/>)

(#9) Many seniors died early in the pandemic (because the early waves of Covid were strong.) But many people were not aware that ventilators and Remdesivir were as deadly as they were, contributing to deaths “**with** Covid.” (2 slides, #9 <https://totalityofevidence.com/timeline/remdesivir-dropped-from-ebola-trial-in-drc/>; <https://www.ncbi.nlm.nih.gov/pmc/articles/PMC10723072/>)

(#10) The death rate in Canada is going UP not DOWN despite so many people supposedly “protected” from Covid and the variants getting so much less dangerous. The 80+ age group is continuing to die from COVID at an increasingly higher rate despite many seniors getting told to keep “getting immunized” and taking their shots. (2 slides, <https://sheldonyakiwchuk.substack.com/p/mortality-in-canada-trending-up>)

(#11) It has become clear that both lockdowns and vaccine rollouts have INCREASED death. (1 slide, <https://dksdata.com/COVID19#TOP>)

(#12) These shots should no longer be recommended to the elderly (or anyone else) because they do not prevent Covid cases, severe illness, transmission or death. (1 slide, <https://merylnass.substack.com/p/its-official-cdc-and-uk-government>)

(#13) To protect the elderly, the vulnerable and anyone else, building a strong immune response to any incoming infection is important. Those who took the injections should be able have tests done to ascertain the damage and get help reversing it. Canadians can look at studies around Vitamin D, NAC, Elderberry, proteolytic enzymes like Nattokinase and other proven therapeutics with an open mind (8 slides, <https://covid19criticalcare.com/treatment-protocols/> <https://www.canadiancovidcarealliance.org/media/why-are-covid-19-treatments-so-controversial/> <https://www.canadiancovidcarealliance.org/media/covid-19-at-home-treatment-guide-for-healthy-individuals/> <https://followingthecovidscience.substack.com/p/what-is-known-about-optimizing-immunity> & <https://followingthecovidscience.substack.com/p/kicking-out-the-new-bully-on-the>)

(#14) And to hear more from fellow doctors who have been receiving so much pushback for asking questions around the official view on Covid-19 etc., some of them took part in the National Citizens' Inquiry into the government's handling of the Covid crisis. (1 slide, <https://nationalcitizensinquiry.ca/expert-witnesses/>)

Please use this document and the associated slide show as inspiration for further investigation. This important information has been kept quiet these last few years by those who had the wherewithal to keep it from the general public while profiting from the products in question. Please see additional links in the slide show.
