Dear Dr	
---------	--

Thank you for the care and concern you keep showing me. As someone with no or limited access to the internet, I have trusted your guidance and have assumed what you have advised me is indeed best for my situation. However, in speaking to people with more access to internet and the ability to dig deeper into details, I have become aware that medical professionals like you have been put into a very horrible position these past years.

I have found out that there are many legal actions now underway against the makers of the Covid-19 vaccine products, as well as against public health and media officials in many countries. (#1) I have found out that Canadian physicians, have been shamed, bullied, had their office raided, were shut down online and even fired just for asking questions or for doing what I thought every medical professional should naturally be doing — questioning the information that the pharmaceutical companies provide and asking for actual proof of their claims. I was shocked to hear that Health Canada changed the requirements for the vaccine companies to prove that the vaccines were safe and effective before the pandemic and that even though everyone told us these products were "proven safe and effective" there was no proof. (#2) AND I heard that the manufacturers and regulators were aware of the harms of the vaccine BEFORE medical professionals and others were mandated to take the shots. (#3)

So I am worried about you as unbeknownst to me, all this time, you would have been pressured to take these products at a risk to your own long term health while being told it was for your (and my) good. It should be no secret to you that many of your fellow physicians who were also forced to be injected have since suffered long term injuries and even death in ways that match cases that have been investigated and were demonstrated to be caused by different parts of the Covid vaccine products. (#4). I am told that by now, the vaccine has harmed more people than the illness. I know you cannot discuss this with patients, but know that you and your wellbeing are often on my mind (and in my prayers).

Have you had a chance to reach out to other medical professionals who also have had to do a complete turnaround in their thinking about these vaccine products? There are organizations like the Canadian Covid Care Alliance and the Canada Health Alliance who support new members. They exist partly because the fight to combat mainstream media censors along with the power of the "disinformation gurus", are often too strenuous for medical professionals to face alone. Both organizations publish newsletters that you can subscribe to. The CCCA runs a website with information including on the care of the elderly. (#5) They also looked into conflicts of interest among Canadian health officials, etc. which can shatter anyone's confidence in official public health guidance. (#6) Did you know that Health Canada was aware of many of the problems with the Pfizer product but authorized it anyway? (#7)

I am learning that Covid vaccines can suppress the immune system, leaving us at more, not less, risk of getting ill from a very wide range of infections. (#8) I was aware that many of us seniors died early in the pandemic (because the early waves of Covid were strong.) But I was not aware that ventilators and Remdesivir were as deadly as they were, contributing to deaths "with Covid." (#9). I heard recently that the death rate in Canada is going UP not DOWN despite so many people supposedly "protected" from Covid and the variants getting so much less dangerous. But I was not aware of how the 80+ age group is continuing to die from COVID at an increasingly higher rate despite many of us getting told to keep "getting immunized" and taking our shots. (#10) It has become clear that both lockdowns and vaccine rollouts have INCREASED death. (#11) Please no longer recommend these shots to us elderly because they do not prevent Covid cases, severe illness, transmission or death. (#12)

To protect us elderly, remember we need help building a strong immunity and those who took the injections should be able have tests done to ascertain the damage and get help reversing it. I encourage you to look at the studies around Vitamin D, proteolytic enzymes, Nattokinase, NAC, Elderberry and other proven therapeutics with an open mind as I am looking for your help so I can start accessing them. (#13) And to hear more from fellow doctors who have been receiving so much pushback for asking questions around the official view on Covid-19 etc., many of them can be heard as part of the National Citizens' Inquiry into the government's handling of the Covid crisis. (#14)

I hope you accept this letter in the spirit it was given - as a tool for sharing important information that has been kept quiet these last few years.

Sincerely,
